

RTS SOLUTIONS

FOR ALGORITHMIC TRADERS

Algorithmic traders must prioritize speed, reliability and time to market in order to maintain an edge. RTS shares these priorities. Our innovative, high-performance and scalable algorithmic solutions give our customers the upper hand. Our algorithmic product suite includes the entire value chain – from RTD Tango, our “plug-n-play” event-based algorithmic trading system to our socket-based exchange interfaces. And don’t forget RTS’ first-class customer service.

Algorithmic traders have special needs. We cater to these needs by allowing customers to choose between standard RTS packages or customized solutions. All RTS components run on the same platform in the same environment, which makes our solutions extremely scalable.

Key features for algorithmic traders include:

- Advanced, highly-customizable front-end
- Easy connection to over 100 markets
- Access to a wide variety of products and asset classes from one window
- Server-based automated trading tools
- Integrated risk management
- Hassle-free hosting solutions
- Extremely low internal latency
- Back testing capabilities

EVENT-BASED ALGORITHMIC TRADING SYSTEM

The cornerstone of RTS’ solutions for algorithmic traders is RTD Tango. Tango helps customers program, test and implement a wide variety of strategies – from simple to complex – across all asset classes. Our event-based system is a high-performance tool that allows you to code, test and deploy your trading logic in a fraction of the time it would take to program and deploy an in-house solution.

PERFORMANCE

RTS solutions are both fast and robust. We back up our claims by giving you server logs that are time stamped to the microsecond so that you can verify performance for yourself. The integration into RTS’ infrastructure minimizes internal latency for market data and execution to the low sub milliseconds. Order processing and performance are constantly improved to respond to highly speed sensitive trading styles.

CUSTOMER SERVICE

RTS has customer service teams available around the clock and located across the globe that are dedicated to resolving issues efficiently and quickly. Our functional and technical support hotline is available 24 hours a day to help you when you need it most.

We pride ourselves on excellent customer service. Our team of experts analyzes, installs and pre-configures our solutions with your products and limits before we deliver them to you. You will also receive on-site training on how to best use our solutions from RTS staff with real trading experience.

RTS SOLUTIONS

FOR ALGORITHMIC TRADERS

SOLUTIONS FOR YOU

RTD

The RTD Realtime Trading Desktop (RTD) is RTS' high-performance front-end trading platform used by professional traders around the globe. RTD is the platform of choice, empowering customers to trade multiple asset classes on over 100 markets from a single screen.

Engineered to provide a competitive edge, RTD is renowned for speed and reliability.

RTD Automated Trading Tools

In addition to the RTD Realtime Trading Desktop core package, RTS offers a variety of cutting edge automated trading tools. The RTD Quote Machine[®], RTD Electronic Eye[®], RTD Spreader, RTD Basket Trader[®] and the RTD Sales Trader provide traders with a competitive edge. Open APIs written in FIX or the RTS proprietary code help you maximize your edge as they promote problem-free development and seamless deployment of your in-house or third party applications.

RTD Tango

RTD Tango is a high-performance, event-based algorithmic trading system that empowers users to quickly code, test and

deploy thousands of trading strategies simultaneously. It is a multi-asset, multi-exchange solution, tailored to handle the most complex multi-layer algorithmic and trading strategies and is suitable for a broad range of industry professionals and business models.

Connectivity

RTS Realtime Systems offers high-performance access to the world's leading trading platforms. Gateways to over 100 exchanges, broker networks and liquidity pools provide customers with the flexibility to rapidly and reliably connect to international marketplaces – wherever trading opportunities develop.

Hosting Services

RTS's global market access solution lets you trade multiple asset classes on the world's leading trading venues – without the need for complex dedicated infrastructure and support. By using our redundant hosted architecture, located in state-of-the-art data centers, you can access local and remote exchanges and other trading venues, hassle-free. RTS data centers and hosting facilities offer additional benefits in terms of network optimization. With proximity hosting, your trading software is run locally, thus minimizing network latency and improving execution.
