

RTS SOLUTIONS

FOR THE SELL-SIDE

In today's highly competitive environment, being able to offer customers added value has never been more important for sell-side firms. RTS solutions give sell-side firms cost-effective, high-performance professional trading tools that can be deployed easily to customers.

Benefit from RTS' strong brand recognition by re-distributing RTS solutions "as is" to your customers or customize them in your own look and feel. RTS gives you the advanced technology that you need to attract and satisfy customers without having to deal with the high costs of capital and resources involved with in-house development and maintenance.

RTS solutions also help sell-side firms meet their proprietary business needs. Sell-side firms have special needs. We cater to these needs by allowing customers to choose between standard RTS packages or customized solutions. All RTS components run on the same platform in the same environment, which makes our solutions extremely scalable.

Key features for sell-side firms include:

- Internet-based, easily deployable Java-based front-end
- White label opportunities
- Easy connection to over 100 markets
- Integrated risk management
- Hassle-free hosting solutions

A COMPETITIVE EDGE

Engineered to give a competitive edge, RTS is renowned for speed and reliability. Now you can give your customers the same edge that RTS has given professional traders. We provide a variety of software solutions, connectivity alternatives, hosting facilities as well as hardware components that help you create customized solutions that meet or exceed your requirements. Depending on your needs, you can choose between standard RTS packages or customized solutions. All RTS components run on the same platform in the same environment, which makes our solutions extremely scalable.

Customers of all levels of sophistication around the world use RTS solutions to enhance their performance. Our advanced option pricing features, integrated Delta hedging, sophisticated trading front-end and our plug and play algorithmic trading tool give users a powerful competitive edge. On the back-end, our integrated server-based risk management tools work simultaneously to help prevent user error and manage risk.

ALGORITHMIC SOLUTIONS

Sell-side firms can now offer their customers RTS' algorithmic trading tool, RTD Tango. RTD Tango is RTS' algorithmic trading tool, designed to meet the industry trend towards algorithmic trading. Tango helps customers program, test and implement a wide variety of strategies – from simple to complex – across all asset classes.

CUSTOMER SERVICE

RTS has customer service teams available around the clock and located across the globe that are dedicated to resolving issues efficiently and quickly. Our functional and technical support hotline is available 24 hours a day to help you when you need it most.

RTS SOLUTIONS

FOR THE SELL-SIDE

We pride ourselves on excellent customer service. Our team of experts analyzes, installs and pre-configures our solutions with your products and limits before we deliver them to you. You will also receive on-site training on how to best use our solutions from RTS staff with real trading experience.

SOLUTIONS FOR YOU

RTD

The RTD Realtime Trading Desktop (RTD) is RTS' high-performance front-end trading platform used by professional traders around the globe. RTD is the platform of choice, empowering customers to trade multiple asset classes on over 100 markets from a single screen.

Engineered to provide a competitive edge, RTD is renowned for speed and reliability.

RTD Automated Trading Tools

In addition to the RTD Realtime Trading Desktop core package, RTS offers a variety of cutting edge automated trading tools. The RTD Quote Machine[®], RTD Electronic Eye[®], RTD Spreader, RTD Basket Trader[®] and the RTD Sales Trader provide traders with a competitive edge. Open APIs written in FIX or the RTS proprietary code help you maximize your edge because they promote problem-free development and seamless deployment of your in-house or third party applications.

CONTACTS

For more information or to schedule a demonstration, please contact your local RTS office or send an e-mail to sales@rtsgroup.net or visit www.rtsgroup.net.

RTD Tango

RTD Tango is a high-performance, event-based algorithmic trading system that empowers users to quickly code, test and deploy thousands of trading strategies simultaneously. It is a multi-asset, multi-exchange solution, tailored to handle the most complex multi-layer algorithmic and trading strategies and is suitable for a broad range of industry professionals and business models.

Connectivity

RTS Realtime Systems offers high-performance access to the world's leading trading platforms. Gateways to over 100 exchanges, broker networks and liquidity pools provide customers with the flexibility to rapidly and reliably connect to international marketplaces – wherever trading opportunities develop.

Hosting Services

RTS' global market access solution lets you trade multiple asset classes on the world's leading trading venues – without the need for complex dedicated infrastructure and support. By using our redundant hosted architecture, located in state-of-the-art data centers, you can access local and remote exchanges and other trading venues, hassle-free. RTS data centers and hosting facilities offer additional benefits in terms of network optimization. With proximity hosting, your trading software is run locally, thus minimizing network latency and improving execution.
